Rexia SA was founded in 2001 as an IT-consulting, recruitment and software development company in Switzerland.

In response to our clients' needs, we have created light, efficient and practical tools, which we now bring to your benefit. These solutions all come from business situations, and therefore provide effective solutions.

NextDocument™

a document server solution

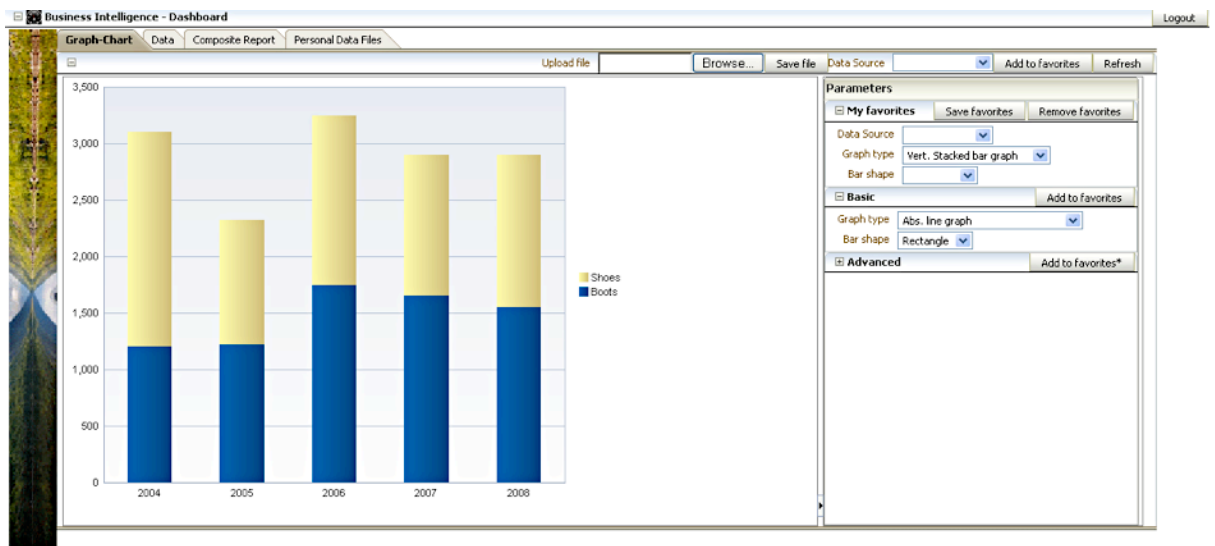

NextDocument™ - Whenever, wherever, everything at hand

Getting the right documents at the right time and place is key to successful business. **NextDocument™** gives you access to your documents anytime and from anywhere through a secured internet connection. Storing, searching, tracking and sharing documents becomes trivial, so you will enjoy the freedom to focus on what really matters.

Any kind of document (texts, images, sound, video, etc.) can be managed by **NextDocument™**, and a direct connection to a fax and a scanner makes this solution applicable to all situations.

NextReport™

dashboards at your fingertips

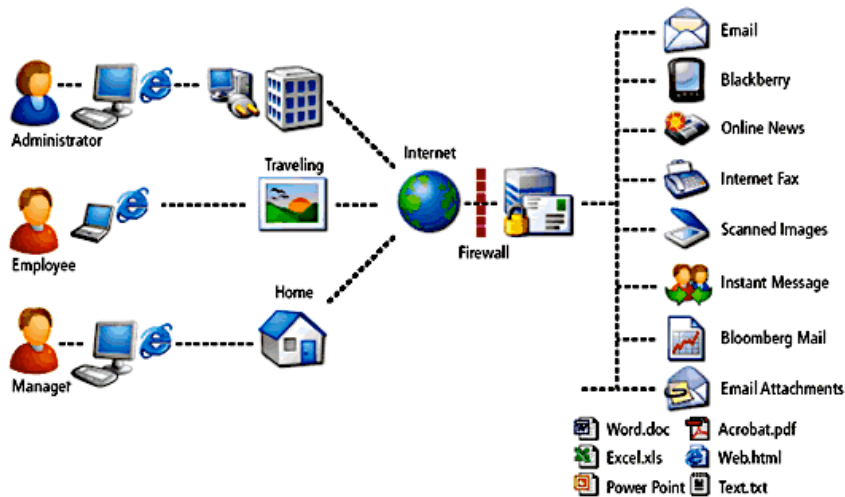

NextReport™ - 2-click charts generation

Your Excel file or database -stored locally or even remotely- is transformed into smart and explicit charts within seconds. Easily updated, they can then be included in all your documents with a simple copy/paste.

NextArchive™

a document archiving system

NextArchive™ - Keep your documents safe and ready to use

Archive your documents and make search, retrieval, sharing and access control easy. In addition, solve the issue of document loss once and for all.

NextProfile™

recruitment management made easy

NextProfile™ - The ideal tool for matching candidates and comparing curriculum vitae

Without an appropriate tool to help you manage recruitment, it is difficult to find the right person at the right time. **NextProfile™** brings the immeasurable benefits of a reactive and targeted recruitment process, allowing you to enroll the most valuable employees at minimal costs. Moreover, your HR function will be relieved from many recurrent non-moneymaking tasks.
